OPERATING INSTRUCTIONS, PARTS LIST & USER MANUAL

20" Core Cutting Saw Model #PEF2051

Telephone: (604) 946-3811
Fax: (604) 946-3788
email: sales@pothierenterprises.com
Web: www.pothierenterprises.com

CORE CUTTING PROCEDURE

(ELECTRIC MOTOR) (#PEF2051 - 14" CORE CUTTING SAW)

- A) MOUNT SAW BLADE SO IT TURNS IN DIRECTION OF ARROW.
- B) LOWER BLADE SO CUTTING EDGE IS BELOW THE OPEN SLOT IN THE CORE CUTTING BRACKET.
- C) TURN SAW SWITCH TO ON POSITION.
- D) TURN WATER ON BY TURNING VALVE IF DIRECT WATER SUPPLY IS USED. IF WATER PUMP IS USED, PUMP WILL START WHEN SAW MOTOR IS TURNED ON. (IF PUMP IS PLUGGED INTO SIDE OF 60 CYCLE MOTOR).
- E) PLACE CORE INTO CUTTING BRACKET AND PUSH CART THROUGH THE BLADE UNTIL CORE IS CUT COMPLETELY IN HALF.
- F) **CAUTION**: DO NOT ATTEMPT TO OVERFEED THE CORE THROUGH THE SAW BLADE, ESPECIALLY WHEN CUTTING HARD CORE. IF OVERFEEDING OCCURS, MOTOR WILL OVERHEAT AND POWER DOWN, AND MAY CAUSE THE WINDINGS TO BURN OUT.
- G) AT END OF DAY, CLEAN ALL CUTTINGS FROM SAW, PUMP AND HOSE.
- H) WARNING: ALWAYS MAKE SURE SAW IS CONNECTED TO A PROPERLY GROUNDED ELECTRICAL OUTLET. FAILURE TO COMPLY WITH THIS WARNING COULD RESULT IN SERIOUS BODILY INJURY.
- I) **CAUTION**: GOOD MOTOR PERFORMANCE IS DEPENDENT ON PROPER VOLTAGE. EXTENSION CORDS THAT ARE TOO LONG AND/OR SMALL REDUCE AVAILABLE VOLTAGE TO MOTOR UNDER LOAD. VOLTAGE AND AMPERAGE SHOULD BE TESTED AT THE MOTOR. USE EXTENSION CORDS NO SMALLER THAN INDICATED BELOW:

MOTOR HP	15' CORD	25' CORD	50' CORD
	230V	230V	230V
5 HP	#10/3	#8/3	#8/3

- J) SINGLE PHASE 60 HERTZ MOTORS ARE EQUIPPED WITH MANUAL RESET OVERLOADS. WHEN OVERLOAD TRIPS TURN SWITCH TO OFF POSITION AND ALLOW 30 MINUTES TO COOL. PUSH THE RESET BUTTON AND TURN SWITCH TO ON.
- K) A 40 AMP CIRCUIT SHOULD BE DESIGNATED SOLELY FOR THE SAW. THE 5 H.P. MOTOR, WHEN ON 230 VOLTS, DRAWS **20 AMPS** WHEN RUNNING, BUT REQUIRES **DOUBLE** THE AMPS FOR STARTING.

IF THE MOTOR DOES NOT GET ENOUGH AMPS, IT WILL EVENTUALLY BURN UP THE START WINDINGS AND FAIL.

APPLICATION CHART FOR CORE CUTTING BLADES

MODEL #VHC24 SEGMENTED

USED FOR CUTTING VERY HARD CORE, SUCH AS CHERT, JASPERITE, QUARTZITE, HARD GRANITES, ETC. IF YOU USE THIS BLADE FOR CUTTING SOFTER CORE, IT MAY WEAR OUT PREMATURELY.

MODEL #HC44 SEGMENTED OR #CCRB14P CONTINUOUS RIM

USED FOR CUTTING HARD CORE, SUCH AS RHYOLITE, GRANITE, SILICIFIED VOLCANICS, ETC. IF YOU USE THIS BLADE FOR CUTTING SOFTER / ABRASIVE CORE, IT MAY WEAR OUT PREMATURELY.

MODEL #CC34 SEGMENTED (#SCQ14) OR #CCRB14 CONTINUOUS RIM

USED FOR CUTTING REGULAR CORE SUCH AS BASALT, DIORITE, DIABASE, GABRO, DOLOMITE, WEATHERED GRANITE, SERPENTINE, AND PERIDOTITE. IF YOU USE THIS BLADE FOR CUTTING SOFTER/ABRASIVE CORE, IT MAY WEAR OUT PREMATURELY. IF YOU USE THIS BLADE FOR HARDER CORE, IT MAY GO DULL AND NOT WANT TO CUT.

MODEL SC54 SEGMENTED

USED FOR CUTTING SOFT/ABRASIVE CORE SUCH AS CONGLOMERATES, SHALES, LIMESTONE, SILICA AND SULPHIDES. IF YOU USE THIS BLADE FOR CUTTING HARDER CORE, IT MAY GO DULL AND NOT WANT TO CUT.

NOTE:

ENSURE BLADES ARE MOUNTED ON SAW SO THEY TURN IN THE CORRECT DIRECTION.

CAUTION:

WHEN SAWING, EASE CORE INTO BLADE, AFTER CONTACT HAS BEEN MADE, THEN APPLY PRESSURE.

ENSURE THAT CORE IS SECURED SO AS NOT TO MOVE WHILE BEING CUT. IF CORE MOVES AND BLADE IS BENT SIDEWAYS, LOSS OF SEGMENTS COULD OCCUR.

OPERATION

Fitting the Blade:

- The blade rotates in a "down-cut" direction. This means that the front of the blade is moving downward while the rear of the blade is moving upward.
- Mount the Blade (DD) so that arrow on blade rotates in this "down-cut" direction. Blade (DD) can be installed / removed by using the 3/4" (19 mm) end of the Wrench (LL) provided.

NOTICE

Note that Blade Shaft Capscrew (BB) has RIGHT HAND THREADS. Installation of the wrong capscrew could damage the blade shaft!

- Using the Wrench (LL) provided (or one of your own) loosen the Capscrew (BB) by turning it Counter-Clockwise.
- 2. Remove the outer Flange (CC). Make sure Outer Flange (CC), Inner Flange (EE), and Arbor (FF) are clean and not damaged.
- 3. Mount Blade (DD) to arbor. Install Outer Flange (CC). Install and tighten Capscrew (BB) by turning it in a Clockwise direction (Right Hand Thread). Use Wrench (LL) to firmly tighten the Capscrew (BB) to arbor shaft.
- After mounting the Blade (DD), it should align over the top of the wooden insert in the Conveyor Cart (C). During operation of this unit, the blade can, and should, pass into the wooden insert, but NOT into the cast aluminum part of the Conveyor Cart (C).

If this is not true, loosen the setscrews that secure the Bearings (H) to the Head Platform Assembly (B). Position the Head Platform Assembly (B) to the left or right until the Diamond Blade (DD) is aligned over the top of the wooden insert, then re-tighten the Bearing (H) setscrews.

A WARNING!

Pothier "Wet" diamond blades MUST be used with water!

If cutting without water use only diamond blades that are intended to be used dry (without water).

DO NOT use Abrasive Blades WITH water!

Always use respiratory protection when dry sawing!

OPERATION

Wet Configuration:

 Fill the water reservoir pan [Pan Weldment (A)] with water to within 1 inch (25 mm) of the top. Be sure that the Electric Water Pump Intake (U) is fully immersed in water at all times. Keep the intake screen clean and free of sludge, slurry, or other foreign material.

Cutting Operations:

- Place material on Conveyor Cart (C) and move conveyor cart to the front of the saw so that the blade DOES NOT contact the material.
- Cutting Methods: This unit allows three methods for the blade to contact the material:
 - Fixed Head: Position Blade (D) to desired height, using Blade Height Control Handle (P). Turn Handle (P) clockwise or counter-clockwise to raise or lower Blade (D). Material can then be pushed into blade. This method is best for reduced blade wear.

2. **Pivot Using Hand Grip:** Hold the Hand Grip (L) and lower the blade into the material. Blade will return to upper position when force is released.

 Pivot Using Foot Pedal (W): Push down Foot Pedal (W) to lower blade into material. Blade will return to upper position when force is released.

OPERATION

Start / STOP of Machine:

- Start the electric motor by turning the Power Switch (RR) to the "ON" position.
- Open the Water Valve (T) fully, and check the water flow before cutting.
- Cut the material using one of the Cutting Methods described in the above section.

A WARNING!

Keep hands clear of rotating blade during operation!
READ ALL SAFETY WARNINGS before operating this machine!

STOP

Stopping the Machine:

Stop machine by turning Power Switch (RR) to OFF position.

A WARNING!

ALWAYS set Power Switch (RR) to OFF position BEFORE connecting to power source! Electric motor will run if Power Switch (RR) is in ON position.

A WARNING!

STOP Machine, and Wait for all blade movement to stop before removing material from machine!

Incidents During Operation:

- If motor stops during operation, check the following:
- 1. Interruption to electrical connection: Check all electrical connections.
- Manual Overload switch has been tripped: Single phase, 60 Hertz motors are equipped with a manual overload Reset Button (PP). If motor stops because of an electrical overload and overload Reset Button (PP) trips, turn motor Power Switch (RR) to OFF position. Allow motor to cool for 5 to 10 minutes, then push the Reset Button (PP). A click indicates that motor is reset and ready for operation. Restart motor by turning Power Switch (RR) to ON position.

SAFETY INSTRUCTIONS

A WARNING!

Before starting up machine make sure you completely read these instructions. Be familiar with operation of the machine before operation!

MANDATORY

INDICATION INFORMATION **INSTRUCTION**

WARNING

PROHIBITION

These signs will give advice for your safety

Before leaving our factory every machine is thoroughly tested.

Follow our instructions strictly and your machine will give you long service in normal operating conditions.

WARNING!

Always make sure the saw is connected to a properly grounded electrical outlet. Failure to comply with this warning could result in serious bodily injury or death!

The operator must wear protective clothing appropriate to the work he is doing.

Any persons not involved in the work should leave the area.

The working area must be completely clear, well lit and all safety hazards removed.

Any persons not involved in the work, should leave the area.

WARNING!

Use ONLY Reinforced Abrasive Blades or Diamond Blades with this machine.

Use ONLY blades marked with a maximum operating speed greater than the blade shaft speed.

DO NOT use carbide tipped, wood cutting, or circular saw blades with this machine.

Conventional "Wet" diamond blades MUST be used with water.

DO NOT use conventional "Wet" diamond blades without water. Using conventional "wet" diamond blades without water can result in injury or death of the operator or persons in the work area!

Before performing any maintenance, ALWAYS locate the machine on a level surface with the engine / motor OFF and the start switch in the OFF position, and the power source disconnected.

SAFETY INSTRUCTIONS

A WARNING!

HEARING HAZARD! DURING NORMAL USE OF THIS MACHINE, OPERATOR MAY BE EXPOSED TO A NOISE LEVEL EQUAL OR SUPERIOR TO 85 dB (A)

DUST WARNING

Cutting, especially when DRY cutting, generates dust that comes from the material being cut, which frequently contains silica. Silica is a basic component of sand, quartz, brick clay, granite and numerous other minerals and rocks. Exposure to excessive amount of such dust can cause:

- Respiratory diseases (affecting your ability to breath), including chronic bronchitis, silicosis and pulmonary fibrosis from exposure to silica. These diseases may be fatal;
- Skin irritation and rash; and
- Cancer according to NTP* and IARC*
 - * National Toxicology Program, International Agency for Research on Cancer

Take precautionary steps

- Avoid inhalation of and skin contact with dust, mist and fumes;
- · Wet cut when feasible, to minimize dust;
- Wear and ensure that all bystanders wear appropriate respiratory protection such as dust masks designed to filter out microscopic particles. (See OSHA 29 CFR Part 1910.1200)

SAFETY FIRST!

WARNINGS DO's AND DO NOT's

WARNING: FAILURE TO COMPLY WITH THESE WARNINGS AND OPERATING INSTRUCTIONS COULD RESULT IN DEATH OR SERIOUS BODILY INJURY.

DO

- DO read this entire operator's manual before operating this machine. Understand all warnings, instructions, and controls.
- **DO** keep all guards in place and in good condition.
- **DO** wear safety approved hearing, eye, head and respiratory protection.
- **DO** read and understand all warnings and instructions on the machine.
- **DO** read and understand the symbol definitions contained in this manual.
- **DO** keep all parts of your body away from the blade and all other moving parts.
- **DO** know how to stop the machine quickly in case of emergency.
- **DO** shut off the engine and allow it to cool before refueling.
- **DO** inspect the blade, flanges and shafts for damage before installing the blade.
- **DO** use only Pothier diamond blades manufactured for use on core cutting saws.
- **DO** use only blades marked with a maximum operating speed greater than the blade shaft speed. Verify speed by checking blade shaft rpm and pulley diameters and blade flange diameters.
- **DO** verify saw drive configuration by checking blade shaft RPM, pulley diameters, and blade flange diameter.
- **DO** read all safety materials and instructions that accompany any blade used with this machine.
- DO inspect each blade carefully before using it. If there are any signs of damage or unusual wear, DO NOT USE THE BLADE.
- **DO** mount the blade solidly and firmly. Wrench tighten the arbor nut.
- **DO** make sure the blade and flanges are clean and free of dirt and debris before mounting the blade on the saw.
- **DO** use wet cutting diamond blades with a 1" (diameter arbor only). Never use damaged or worn blade flanges.
- **DO** use the correct blade for the type of work being done. Check with blade manufacturer if you do not know if blade is correct.
- **DO** operate this machine only in well ventilated areas.
- **DO** instruct bystanders on where to stand while the machine is in operation.
- **DO** establish a training program for all operators of this machine.
- DO clear the work area of unnecessary people. Never allow anyone to stand in front of or behind the blade while the engine is running.
- **DO** make sure the blade is not contacting anything before starting the engine.
- **DO** always tie down the machine when transporting.
- **DO** use caution and follow instructions when setting up or transporting the machine.
- **DO** have all service performed by competent service personnel.
- **DO** verify the blade arbor hole matches the machine spindle before mounting the blade.
- **DO** make sure the gas caps of the machine and the fuel can are properly tightened before starting the engine. Move fuel can at least 10 feet from machine after fueling.
- DO clean the machine after each day's use.
- **DO** remove adjusting keys and wrenches from tool before turning it on.
- **DO** keep the handles dry, clean and free of oil and dirt.
- **DO** carefully maintain and clean for better and safer performance. Follow instructions for changing accessories. Inspect tool cords periodically and, if damaged, have repaired by authorized service facility.
- **DO** use the proper blade flange size for each blade size. Never use damaged or worn blade flanges.
- **DO** use caution when handling fuel.
- **DO** only cut in a straight line.
- DO make sure electric powered machines are plugged into a properly grounded circuit.
- DO make sure power cords are the proper size and in good condition.
- DO follow all electrical codes in your area.
- DO use correct voltage and proper extension cords. Never carry tool by cord or yank it to disconnect it from receptacle. Keep cord away from heat, oil and sharp edges.
- DO disconnect tools from power source when not in use, before servicing and, when changing accessories.
- DO carefully maintain and clean for better and safer performance. Follow instructions for changing accessories. Inspect tool cards periodically and, if damaged, have repaired by authorized service facility.
- **DO** always give a copy of this manual to the equipment user. For extra copies, call (604) 946-3811.

SAFETY FIRST!

WARNINGS DO's AND DO NOT's

WARNING: FAILURE TO COMPLY WITH THESE WARNINGS AND OPERATING INSTRUCTIONS COULD RESULT IN DEATH OR SERIOUS BODILY INJURY.

DO NOT

DO NOT	operate this machine unless you have read and understood this operator's manual. operate this machine without the blade guard, or other protective guards in place. leave this machine unattended while the engine is running. work on this machine while the engine is running. operate this machine when you are tired or fatigued. use a wet blade without adequate water supply to the blade. exceed maximum blade speed shown for each blade size. Excessive speed could result in blade breakage. operate the machine if you are uncertain of how to run the machine. use damaged equipment or blades. touch or try to stop a moving blade with your hand. cock, jam, wedge or twist the blade in a cut. transport a cutting machine with the blade mounted on the machine. use a blade that has been dropped or damaged. use carbide tipped blades. lay power cords in or near water. replace the motor with any motor that does not have a special grounding connection. use segmented diamond blades without water unless specifically designed for dry cutting. touch a dry cutting diamond blade immediately after use. These blades require several minutes to cool after
DO NOT	each cut. use damaged or worn blade flanges. allow other persons to be near the machine when starting, refueling, or when the machine is in operation. operate this machine in an enclosed area unless it is properly vented. operate this machine in the vicinity of anything that is flammable. Sparks could cause a fire or an explosion. allow blade exposure from the guard to be more than 180 degrees. operate this machine with the belt guard or blade guard removed. operate this machine unless you are specifically trained to do so. use a blade that has been over heated (Core has a bluish color). jam material into the blade. grind on the side of the blade. start cutting with a saw until you have a clear work area and secure footing. operate this machine while under the influence of drugs or alcohol.

Pothier Enterprises Ltd. New Equipment Warranty

Except as noted below, Pothier Enterprises Ltd. warrants that its new equipment will be free from manufacturing defects for a period of 1 year from the date of purchase by the original consumer purchaser.

The above warranty is subject to the following exceptions:

1.	To the extent the following components are part of any of the new equipment, Pothier Enterprises' warranty on the component
	parts is limited to the manufacturer's warranty period as set out below:

Gas Engines	Electric Motors	Water Pumps	
ManufacturerWarranty Period	Manufacturer Warranty Period N	Manufactur er Warranty Period	
Honda Gas2Years	Baldor1 Year	Beckett1 Year	
Lees	on1 Year	Little Giant 1 Year	

- 2. Pothier Enterprises Ltd.'s obligation under this warranty is expressly limited to the replacement or repair at Pothier Enterprises Ltd. in Delta, BC or at a service facility designated by Pothier Enterprises Ltd., of such part or parts as inspection shall disclose to have been defective. This warranty does not cover labour or maintenance items such as belts, filters, bearings and wheels. Purchaser is responsible for paying shipping costs to and from the location where the equipment is to be repaired or replaced. Motors and engines are to be serviced by the nearest authorized service centre, as designated by the manufacturer of the engine/motor.
 Under no circumstances will Pothier Enterprises Ltd. be responsible for incidental or consequential damages.
- 3. Pothier Enterprises Ltd.'s warranty does not apply to defects caused by damage, abuse, modifications, low voltage, acts of God, unreasonable use, faulty repairs made by others or defects caused by failure to provide reasonable maintenance. All warranties are void if the equipment or any of its components are altered or modified by the purchasers, or if the product is used in a manner or with a blade not recommended by the manufacturer.
- 4. The foregoing express warranties are in lieu of all other warranties. POTHIER ENTERPRISES LTD. EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTIBILITY AND FITNESS FOR A PARTICULAR PURPOSE.
